

ENS Cloud Services

Protect your mission-critical data and applications.

Server virtualization technology has added complexity as backup windows have exploded. Systems administrators struggle with that complexity and the high costs of managing backups and enterprise disaster recovery while at the same time ensuring high-availability access and data confidence.

ENS Cloud Services provide IT agility, efficiency, and protection through comprehensive, cost effective, and flexible enterprise-level Disaster Recovery, Backup & Restore, protected Hosted Environments, and Business Continuity.

Cutting edge technology that meets business needs & requirements:

- **ENS DR**
Disaster Recovery
- **ENS BR**
Cloud Backup & Restore
- **ENS HE**
Cloud Hosted Environments
- **ENS BC**
Business Continuity

Enterprise Networking Solutions, Inc.
3054 Fite Circle

Agility. Efficiency, Protection.

ENS Cloud bridges the gap between your business objectives and your information technology integrity and availability.

- Real-time server based replication
- Storage specifically optimized for virtualization
- VM-based protection
- Integrates the latest Microsoft technologies

DISASTER RECOVERY

Disaster Recovery Reduce the Costly Impact of Downtime

- Designed for VMware virtualized systems with VMDK-level protection
- Strategies and procedures for mitigating risks and restoring functions
- Regional data center in Rancho Cordova, CA; out-of-state data center in Las Vegas, NV
- Access data via internet or direct access (IPSec tunnel, SSL VPN, RDP, web portal)
- Realize business-required RTO and RPO; response time from 4 to 48 hours depending on business needs and budget

BACKUP & RESTORE

Cloud Backup & Restore High Availability Access and Data Integrity

- Powerful and dependable backup services; access specific data when you need it
- Backup servers, desktops, and laptop files; ability to restore at each seat level
- Compression and deduplication empower efficient backup windows
- Cost efficiency realized by determining types of data and required access
- You determine and manage your needs, ENS BR ensures data integrity and availability

HOSTED ENVIRONMENT

Cloud Hosted Environments Reduce Costs and Change CapEx to OpEx

- Cost-effective, comprehensive, and secure cloud-hosted environment for data and apps
- High availability SLAs based on fault tolerant technologies
- We work with you to migrate and build your secure environment, then you manage it, we protect it. ENS DR and ENS BR are already built in.
- Scalable Infrastructure without increased complexity; options to expand as needed
- Agility to respond to changing business needs and improved financial flexibility
- Support services available with flexibility determined by business needs and budget

BUSINESS CONTINUITY

Business Continuity Keep Your Business Running in the Event of a Business Disruption

- A Business Continuity Plan (BCP) can spell the difference between continued operation or permanent shut down of your organization should a disaster occur.
- Customized BCP recovery priorities and strategies based on your unique business needs
- Tested and proven solutions assure continued communication with customers, vendors, and internal staff
- Timely access to your data and applications so you can continue to take care of business
